

ATV/UTV Contactor/Solenoid Wiring Instructions

Please Note: The last connection made will be the negative (BLACK wire) from the contactor to the battery. This will ensure there is no power to the winch system until you are ready for it. Double check all connections and make sure connections are clean and tight.

SKU : MX-028	SKU : MX-228
This contactor comes with Classic & Max 2000lb-3000lb winches	This contactor comes with mid 2013 and newer Elite winches
