

STEALTH AS-6/AS-10 Active Subwoofer Enclosures

STEALTH AS-6

STEALTH AS-10

- **Rotationally Molded Polyethylene Housing – tough enough to withstand harsh environments**
- **High Efficiency Class D Amp – sealed against moisture and dirt**
- **Easy Plug & Play connection with STEALTH Sound Bars, or any other system**
- **High Excursion subwoofer driver – computer matched to the enclosure**
- **Remote level control included**
- **Stainless steel mounting hardware included. Adjustable mounting feet on the AS-6.**
- **Durable aluminum grill to match the STEALTH Sound Bars**
- **Auto or manual turn-on function**
- **Thermal & over/under voltage protection**

STEALTH Subwoofer Specifications

	STEALTH AS-6	STEALTH AS-10
Amplifier Power @ < 0.2% THD	250 Watts	500 Watts
Frequency Response		20Hz – 250Hz
Battery Voltage Range		10.5 – 16 VDC
Variable Low Pass Crossover		50 Hz – 200 Hz
Variable Bass Boost		0-12dB @ 45 Hz
Dimensions	8.75" w x 8.5" h x 9.25" d	14.75" w x 12.75" h x 11.5" d
Weight	16.6 Lbs	22.4 Lbs
Retail Price	\$399.99	\$599.99
Availability	October 2016	September 2016

FAQs on the STEALTH AS-6 & AS-10 Active Subwoofer Enclosures

What are the differences between the STEALTH AS-10 & our previous HT-AS10?

1. Rotationally Molded Polyethylene Housing, instead of fiberglass. Although the footprint of the two are identical, the molded housing is stronger, lighter, and more durable than the fiberglass.
2. Harness to connect instead of terminals on the amp. This improves the water resistance & simplifies connection to a Wet Sounds Sound Bar.
3. New AL Mesh grill – stronger, plus they match the sound bars.

Why are amplifier specifications different on the AS-10 & AS-6? The amps look similar.

The amp on both units is identical. We adjust the output of the amp by carefully matching the impedance of the subs. The AS-10 requires more power, so the impedance of the sub is lowered to result in 500 watts of output power from the amp. The AS-6 requires less power, so the impedance of the sub is raised to result in 250 watts of power from the amp.

How will I adjust the controls on the amplifier?

The controls are behind a clear plastic panel with a rubber gasket to keep water, mud and dust away. Once the sub is installed & the levels are set, the only adjustment needed will be the included remote level control to fine tune the output of the sub. This control is interchangeable with AS-6, AS-10 & even the HT-AS10.

How easy is this to install with my Wet Sounds Sound Bar?

AS-6 & AS10 have been designed with the correct connections to be “plug & play” with our sound bars. The Remote Turn On Wire connects to the remote out on newer sound bars, but if a user has an older sound bar the sub has auto sensing as well to turn on automatically. The installation is incredibly easy if a user has a Wet Sounds sound bar, but will work perfectly with another brand as well.

How do the adjustable feet on the AS-6 work?

Each can be rotated 90 degrees, which allows each corner to have the mounting foot either come out from the front of the housing or the side of the housing.

Can I improve the performance of the AS-6/10 by using a different woofer or amplifier?

No. The components used in the STEALTH AS-6/10 subwoofers are designed for maximum performance as complete unit. Substitution of any other amplifier or subwoofer driver is not recommended as it will degrade the performance and void the warranty.

Where is the best place to mount my subwoofer?

The physics of sound tell us that any subwoofer increases its output when allowed to “load” into a wall, corner, or some other structure. Since every vehicle & application is different, we suggest you experiment & move the subwoofer around to find the optimal position.

How are they packaged?

The AS6/10 come in all new full color gift box packaging designed to have a “family” resemblance with our latest STEALTH Sound Bar packages. When placed on a showroom floor or a dealership parts display, these will help the product sell themselves.

When will these subs be available?

AS-10s are available as of September 19. AS-6s will follow close behind in October. We have ample inventory arriving & re-orders have already been placed. Sell all you want – we’re making more!
